Your pipeline, *accelerated*

Clout WMB is a fully operational wholesale division of Cliffco, Inc. Our industry leading experience in Qualifying and Non-Qualifying Mortgages has made us a name that originators can trust; and our technology gives originators a platform and process their pipeline can rely on.

Our vision

To be the wholesale lender of choice for the country's most ambitious originators and the name brokers reach for when speed, certainty, and sophistication matter most.

Our mission

To empower mortgage originators and brokers with the technology, pricing, and precision they need to move faster than the market and close with confidence.

Our values

VELOCITY WITH PURPOSE

We move fast because our process is precise: same-day answers and a clear-to-close a broker can put their name on.

PRECISION IS THE STANDARD

Pricing, conditions, and docs are right on the first pass, so a broker never has to apologize for our work.

OUR BROKERS' SUCCESS IS OUR OWN

Every product, tool, and turn time is measured against one question: does this help an originator close more?

OWN EVERY RELATIONSHIP

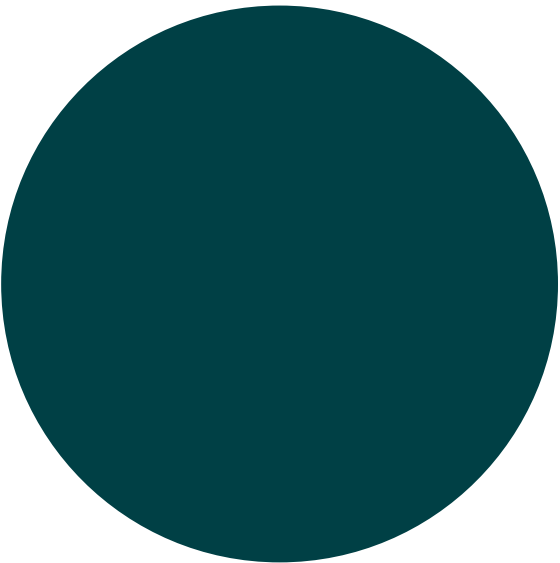

Know the file, answer first, and treat every scenario as if the entire partnership depends on it.

DEAL IN CERTAINTY

Honest pricing, real timelines, and difficult news delivered first, because a broker should never have to guess.

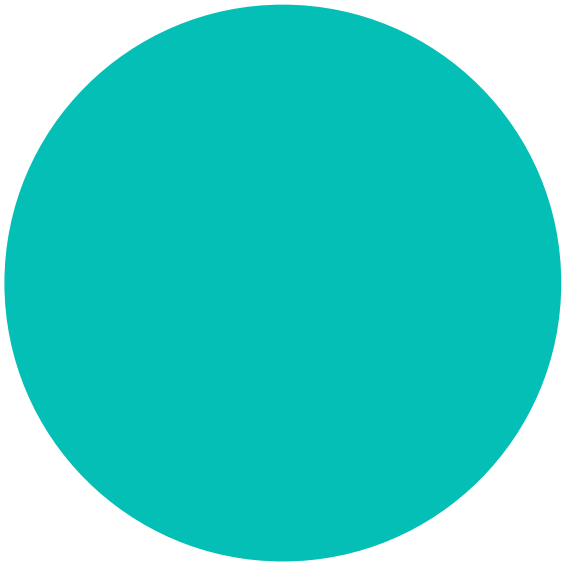

Color Palette

DEEP RESERVE *(Primary)*

HEX: #004045
RGB: 0, 64, 69
CMYK: 100, 7, 0, 73

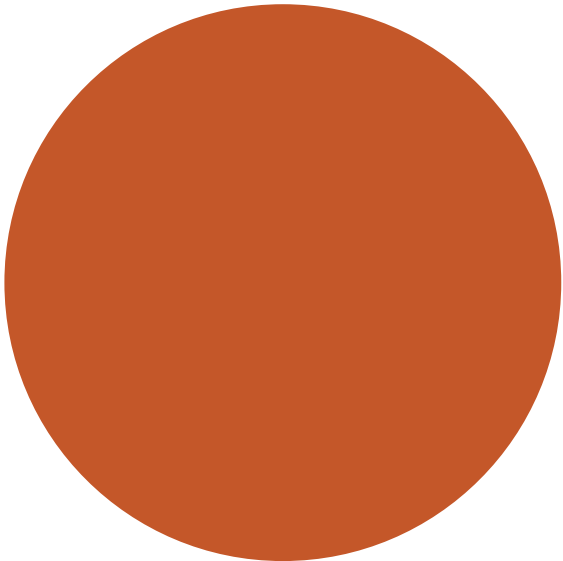

The foundation of the brand. A deep, composed teal that carries the weight of an institution: use it for headlines, primary surfaces, and anywhere Clout needs to feel established and certain.

HEX: #03BFB5
RGB: 3, 191, 181
CMYK: 98, 0, 5, 25

SIGNAL *(Secondary)*

The velocity in the palette. A sharp, electric aqua reserved for moments of action and proof, including CTAs, data highlights, and interactive states. Used sparingly, it reads as precision; used everywhere, it loses its charge.

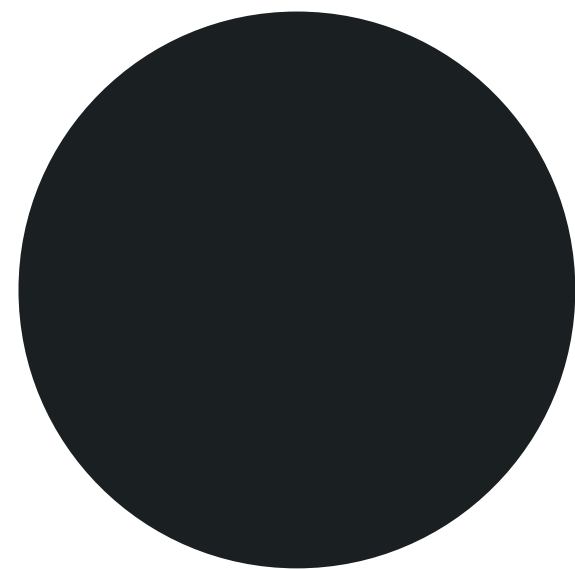

HEX: #C45729
RGB: 196, 87, 41
CMYK: 0, 56, 79, 23

COPPER SEAL *(Accent)*

The boutique detail. A burnished copper that works like a wax seal or foil stamp: eyebrows, rules, small callouts, and moments of distinction. Never a dominant color, always the finishing touch.

Color Palette

GRAPHITE *(Dark Neutral)*

HEX: #1A1F21
RGB: 26, 31, 33
CMYK: 21, 6, 0, 87

The near-black workhorse. Body text, dark-mode surfaces, and anywhere pure black would feel harsh. It keeps long-form copy legible while staying inside the palette's cool undertone.

HEX: #F0F5FA
RGB: 240, 245, 250
CMYK: 4, 2, 0, 2

PORCELAIN *(Light Neutral)*

A cool, airy off-white with a hint of blue. The default light background, giving pages room to breathe and letting Deep Reserve and Signal do the talking.

HEX: #F2F2F5
RGB: 242, 242, 242
CMYK: 1, 1, 0, 4

SILK *(Light Neutral)*

A soft, warm-gray white for secondary surfaces, cards, and dividers. Nearly invisible on its own, which is the point: it creates quiet structure without competing.

The Logo

*clout*wmb

A Division of Cliffco, Inc.

The Clout WMB word-mark visualizes the boutique, elevated experience we aim to achieve with our clients. “Clout” represented by the font Jitzu in Deep Reserve gives the logo a boutique, personal, and confident feel, while “WMB” represented by the font Grift in Signal gives the logo a bold, clean, and modern feel representative of our process and technology. The crossbar of the script “t” flows directly into the “w” showing the connection of the two as one continuous motion. Precision meets technology, while the text beneath “A Division of Cliffco, Inc.” anchors Clout in credibility.

Logo Use & Variations

ACCEPTABLE LOGO VARIATIONS

Acceptable variations of the logo are shown here. The full logo can be utilized in both black and white and both with and without "A Division of Cliffco, Inc.". Signal should only be used for "WMB" in both the full color and the white and teal version and should never be utilized for the word "Clout" or for the full color of the logo. Any other logos outside of the variations on this page are unacceptable variations.

The Icon Logo

The icon distills the word-mark to its essential gesture: an interlocking “c” and “w” drawn in the same script hand, rendered in Deep Reserve. The strokes sweep forward and overlap like a monogram on private stationery, and the mark resolves in a single Copper Seal dot at the terminal of the “w,” the finishing touch that punctuates the signature the way a wax seal closes a letter. Built to hold its presence at any size, it serves as the avatar, favicon, and app mark, and as a standalone emblem wherever the full word-mark has already done its work.

Icon Use & Variations

ACCEPTABLE ICON VARIATIONS

Acceptable variations of the icon logo are shown here. There are two full color versions: one in Deep Reserve with the dot in Copper Seal, and one in Deep Reserve and Signal. The Full Color Porcelain Variations are the inverse of this: one icon in Porcelain with the dot in Copper Seal, and the other in Porcelain and Signal. The icons can also be used in all black or all Porcelain.

Any other icon logo variations outside of those shown here are not acceptable variations.

Logo Sizes & Safe Areas

To ensure legibility of our logo, sizes should be no smaller than 180px or 1.5 inches wide for our full logo and no smaller than 35px or .50 inches for our icon logo.

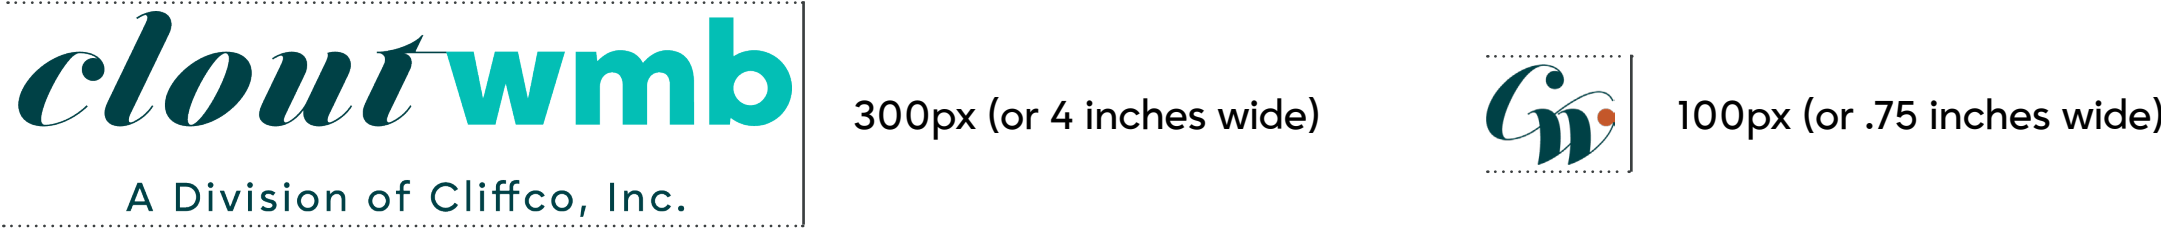

It is important that a safe area is left around the logo. The amount of unobstructed space that must surround the logo + word-mark is at least 1x where X equals the height of "b" in the word-mark.

This area should be kept free of any other graphic elements – including photography, logos, text, shapes, and illustrations.

MINIMUM SIZING FOR SMALL USE LOGOS

MAXIMUM SIZING FOR SMALL USE LOGOS

SAFE AREAS

Logo Misuse

- X Do not alter, rotate, or modify it in any way
- X Do not surround it with other designs or symbols.
- X Do not accessorize it with extra elements such as outlines, drop shadows, glows, etc.
- X Do not overemphasize it

EXAMPLES OF LOGO MISUSE SHOWN HERE

*clout*wmb

A Division of Cliffco, Inc.

Do not create versions of the logo that contain only one brand color
(with the exception of black and porcelain versions)

*clout*wmb

A Division of Cliffco, Inc.

Do not use different colors

*clout*wmb

A Division of Cliffco, Inc.

Do not distort the logo

*clout*wmb

A Division of Cliffco, Inc.

Do not outline the logo

*clout*wmb

A Division of Cliffco, Inc.

Do not change the transparency

*clout*wmb

A Division of Cliffco, Inc.

Do not use drop shadows or any
other effects

One-Color Use

The full-color logo will not perform well on photography and various background colors. In those cases, the one-color logo should be used. The one-color logo should only be used on photographs and colors within the Clout color palette. The one-color logo should only be used in black and porcelain as shown below.

Brand Pattern

The Clout WMB brand pattern adds a touch of elegance to the brand. The pattern is a repeating field of small radial sparks, arranged in a precise, even grid. Each mark is a burst of fine strokes radiating from a center point and a quiet nod to momentum. The pattern can be overlaid on any of the brand colors with an opacity ranging between 5-15% depending on the background color used. The pattern should never distract from text or other elements on top of it.

Our *Voice*

PRECISE

We speak to professionals (brokers, loan officers, account executives) as peers. Our audience is fluent in the industry, dislikes hype, and is judged daily on speed and certainty. Our voice earns their trust by being as sharp and efficient as our platform.

COMPOSED

We never shout or exclaim. We use restraint and let our work speak for itself. We use shorter sentences, fewer exclamation points (target: zero), and never come across desperate in our tone. Confidence is communicated through calm. We state facts and let them land.

BROKER-FLUENT

We speak the language of the trade without over-explaining it. LTV, DSCR, Non-QM, lock desk, CTC — our reader knows these terms, and using them naturally signals that we're on the inside with them. We never pad copy with borrower-facing platitudes about "the dream of homeownership."

MOMENTUM-MINDED

The tagline is a promise of acceleration, so our language moves. Active voice, strong verbs, forward tense. Every message should feel like it's removing friction, not adding process.

Typography

Brand Headlines & Body Text: Grift

When using Grift to create headings on print or digital collateral, always typeset it with tracking of 0 and set it in title case or sentence case (as determined by the content). Do not set it in all-caps or all-lowercase. Grift can be used alone in a heading or paired with Jitzu.

When using Grift for body text, the same standards noted above should also apply.

Accent Text & Web Substitute: Open Sans

Open Sans should be utilized as stylistic accent text in eyebrows, small captions, CTAs or callouts. Open Sans should be typeset with tracking of 100 and set in all-caps. It should never be used in title case or sentence case unless being utilized as a website substitute font. The bold font should be utilized most often for this typeface.

HEADLINE / CALLOUT

Sample Accent Text

Brand Headlines & Subheadlines: *Jitzu*

When using Jitzu to create headings on print or digital collateral, always typeset it with tracking of 0 and set it in title case or sentence case (as determined by the content). Do not set it in all-caps or all-lowercase. When paired with Grift on headlines, it should be used intentionally to show emphasis on specific words or phrases.

Jitzu should only be paired with Grift on headlines, and not subheadlines.

Headline Samples

Ideal Stack

The following is a sample of an ideal font stack using Grift and Jitzu for headlines, Grift for body text, and Open Sans for CTAs. The exact sizes are not prescriptive and should be adapted to the size of materials and layouts for which they are being designed. However, general proportions, weight, and notes on kerning and tracking should be kept in tacts for all layouts.

Photography

Our photography style can be described as editorial photography with a cinematic, quietly luxurious mood. Warm, slightly desaturated color grade with golden undertones, reminiscent of Kodak Portra film. Subtle 35mm film grain. Natural or directional window light, soft shadows, no flash. Strong single subject with generous negative space; rule-of-thirds or off-center composition with room for typography. Shallow depth of field. Textures of glass, wood, stone, paper, and tailored fabric. Confident, candid, unposed moments; subjects mid-motion or in focused thought, never looking at camera. No staged handshakes, no forced smiles, no cluttered backgrounds. **Aspect:** clean, architectural, modern professional. **Mood:** composed momentum.

Logos should be thoughtfully placed on photography with plenty of whitespace around it.

Thank *you.*
